

Scope Approval

Project Description

A design app that allows the user to input wall colour codes (from paint brands) alongside your shade of furniture and flooring to see what matches well with that colour.

MVP Goals

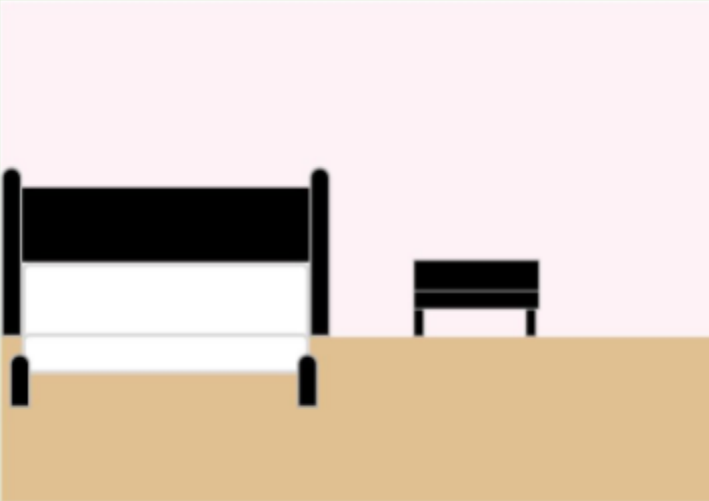

1. Landing page to welcome user to the site
2. Button that will take user to the app section
3. Display wall colours to the user based on their input in the website form
4. Buttons for user to choose shade of furniture and flooring

Stretch Goals

1. Saving a 'favourites' list of colours the user wants to go back to
2. Toggle in between favourites list to bring up the wall colour again
